SITE NAME: Castle Rock Sport Shop

BRRS #: 03-01-001227

CLOSURE DATE: August ???, 2002

STREET ADDRESS: 2328 County Highway Z

CITY: Town of Quincy, Adams County

SOURCE PROPERTY GPS COORDINATES (meters in WTM91 projection):

X= 525076

Y= 382757

OFF-SOURCE CONTAMINATION (>ES):

☐ Yes

☒ No

IF YES, STREET ADDRESS 1: _____

GPS COORDINATES (meters in WTM91 projection):

X= _____

Y= _____

CONTAMINATION IN RIGHT OF WAY:

☐ Yes

☒ No

DOCUMENTS NEEDED:

Closure Letter, and any conditional closure letter issued

Copy of most recent deed, including legal description, for all affected properties

Certified survey map or relevant portion of the recorded plat map (*if referenced in the legal description*) for all affected properties

County Parcel ID number, *if used for county*, for all affected properties

Location Map which outlines all properties within contaminated site boundaries in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy)

Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy)

Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)

Isoconcentration map(s), *if available from site investigation (SI)* (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of contamination defined. **If not available, include the following 2 types of maps:**

Latest groundwater flow/monitoring well location map

Latest extent of contaminant plume map

Geologic cross-sections, *if available from SI*. (8.5x14" if paper copy)

RP certified statement that legal descriptions are complete and accurate

Copies of off-source notification letters (if applicable)

Letter informing ROW owner of residual contamination (if applicable)

Copy of (soil or land use) deed restriction(s) or deed notice *if any required as a condition of closure*.

SUBJECT: Castle Rock Sport Shop, Friendship, Adams County,
DNR Case #03-01-001227

Dear Mr. Kreisler:

I am pleased to inform you that the above-referenced case has been conditionally closed by the Wisconsin Department of Natural Resources. The West Central Region Closeout Committee reviewed your closeout request on November 30, 1999. Based on all information contained in the site file and submitted by your consultant, the Committee has decided that no further investigation or clean-up action is needed at the above-referenced site. **Please be aware, however, that your closeout will not be considered final until all the conditions discussed below are satisfactorily completed.**

Based on the investigative and remedial documentation provided to the Department, it appears that the petroleum contamination at the above-named site has been remediated to the extent practicable under current site conditions. Therefore, the Department considers the case "closed," having determined that no further action is necessary on the site at this time. However, due to the presence of residual contamination in groundwater at levels exceeding the NR 140 enforcement standard for naphthalene and recent preventive action limit exceedances for lead, xylenes, and trimethylbenzenes, a condition of the closeout of the case is that the owner sign and record a groundwater use restriction for the property within 30 days of receiving this letter. A copy of the Department's close-out letter must be attached to the groundwater use restriction. **You must submit a draft of the restriction to the Department for review before recording the restriction.** To document that this condition has been complied with, the property owner must submit to the Department a copy of the recorded deed restriction, with the recording information stamped on it, within 15 days after the County Register of Deeds returns the deed restriction to the property owner. The deed restriction may be amended in the future with the approval of DNR if conditions change at the site and the residual contamination is remediated. A model groundwater use restriction is enclosed.

Limited residual soil contamination may exist in the Pit 2 area. Based on available information, the Department believes this contamination does not pose a threat to human health or the environment.

The monitoring wells and/or boreholes that were installed as part of your investigation and remedial action, must be properly abandoned in accordance with the Department of Natural Resources Administrative Code Chapter NR 141.25. Documentation substantiating proper abandonment (Form 3300-5W) should be forwarded to me, and at that time the case will be considered closed.

SUBJECT: Final Case Closure By Closure Committee With Conditions Met
Castle Rock Sports Shop, 2328 CTH "Z", Friendship, WI

Dear Mr. Kreisler:

On November 30, 1999, your site as described above was reviewed for closure by the Wisconsin Department of Natural Resources Westcentral Region Closure Committee. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On December 14, 1999, you were notified that the Closure Committee had granted conditional closure to this case.

On December 3, 2002, the Department received correspondence indicating that you have complied with the conditions of closure. The conditions for closure required by the West Central Region Closure Committee included filing a groundwater use restriction for residual groundwater contamination and abandonment of all monitoring wells used in the investigation and cleanup of this site. However, instead of recording the groundwater use restriction, you have decided to pay the fee required to list your site on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Based on the correspondence and data provided, it appears that your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the registry. To review the sites on the GIS Registry web page, visit <http://gomapout.dnr.state.wi.us/org/at/et/geo/gwur/index.htm>

If this is a PECFA site, section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

February 7, 2003
Mr. Randall Kreisler
Page 2

BRRTS #03-01-001227

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at (715) 421-7850.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tom Hvizdak', with a stylized flourish at the end.

RE: NOTICE OF GROUNDWATER CONTAMINATION

Castle Rock Sport Shop
2328 Highway "Z"
Friendship, Wisconsin 53934
WDNR No. 03-01-001227
MES Project No. 21039

Dear Mr. & Mrs. Falk:

Groundwater contamination remains at the referenced site. The levels of naphthalene on your property are above the state enforcement standards found in Chapter NR 140, Wisconsin Administrative Code. The levels of trimethylbenzene, xylene, and lead on your property are above the state preventive action limits, also found in Chapter NR 140, Wisconsin Administrative Code. However, the environmental consultant who investigated this contamination has informed me that this groundwater contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 726 or chapter NR 746. Further, this site appears eligible for closure under ch. NR 746 Wisconsin Administrative Code. I have requested that the Department of Natural Resources accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation.

Neither you nor any subsequent owner of your property will be held responsible for investigation or cleanup of this groundwater contamination, as long as you and any subsequent owners comply with the requirements of section 292.13, Wisconsin Statutes, including allowing access to your property for environmental investigation or cleanup if access is required. For further information on the requirements of section 292.13, Wisconsin Statutes, you may call 1-800-367-6076 for calls originating in Wisconsin, or 608-264-6020 if you are calling from out of state or within the Madison area, to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination."

The Department of Natural Resources granted conditional site closure on November 30, 1999. The closure was conditional on recording a groundwater use restriction on the property. The groundwater use restriction necessitated recording the presence of groundwater contamination on the property deed. The Department of Natural Resources recently established an alternative mechanism for closing sites where groundwater contamination remains at levels above the NR 140 enforcement standards. The alternative closure mechanism, listing the property on the geographical information system database on closed sites, does not require recording a deed modification at the register of deeds.

All properties within the site boundaries where groundwater contamination exceeds chapter NR 140

OFF SITE NOTICE OF GROUNDWATER CONTAMINATION

Castle Rock Sport Shop

Friendship, Wisconsin

WDNR No. 03-01-001227

Page 2

enforcement standards and preventive action limits will be listed on the Department of Natural Resources geographic information system (GIS) Registry of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where groundwater contamination above Chapter NR 140 enforcement standards and preventive action limits was found at the time that the case was closed. This GIS Registry is available to the public on the Department of Natural Resource internet web site. A copy of the property deed with the legal description is attached. Please review the enclosed legal description of your property, and notify me within the next 30 days if the legal description is incorrect.

As an affected property owner, you have a right to contact the Department within 30 days to provide any technical information that you may have that indicates that closure should not be granted for this site. If you would like to submit any information to the Department of Natural Resources that is relevant to this closure request, you should mail that information to: Mr. Tom Hvizdak, Wisconsin Department of Natural Resources, 473 Griffith Avenue, Wisconsin Rapids, Wisconsin 54494.

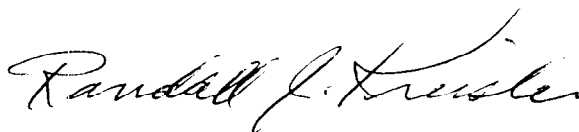

Should you or any subsequent property owner wish to construct or reconstruct a well on your property, special well construction standards may be necessary to protect the well from the residual groundwater contamination. Any well driller who proposes to construct a well on your property in the future will first need to call the Diggers Hotline (1-800-242-8511) if your property is located outside of the service area of a municipally owned water system, or contact the Drinking Water program within the Department of Natural Resources if your property is located within the designated service area of a municipally owned water system, to determine if there is a need for special well construction standards.

You may access the DNR GIS Registry of Closed Remediation Sites on the internet at <http://gomapout.dnr.state.wi.us/org/at/et/geo/gwur/index.htm>. A copy of the closure letter is included as part of the site file on the 015 Registry of Closed Remediation Sites."

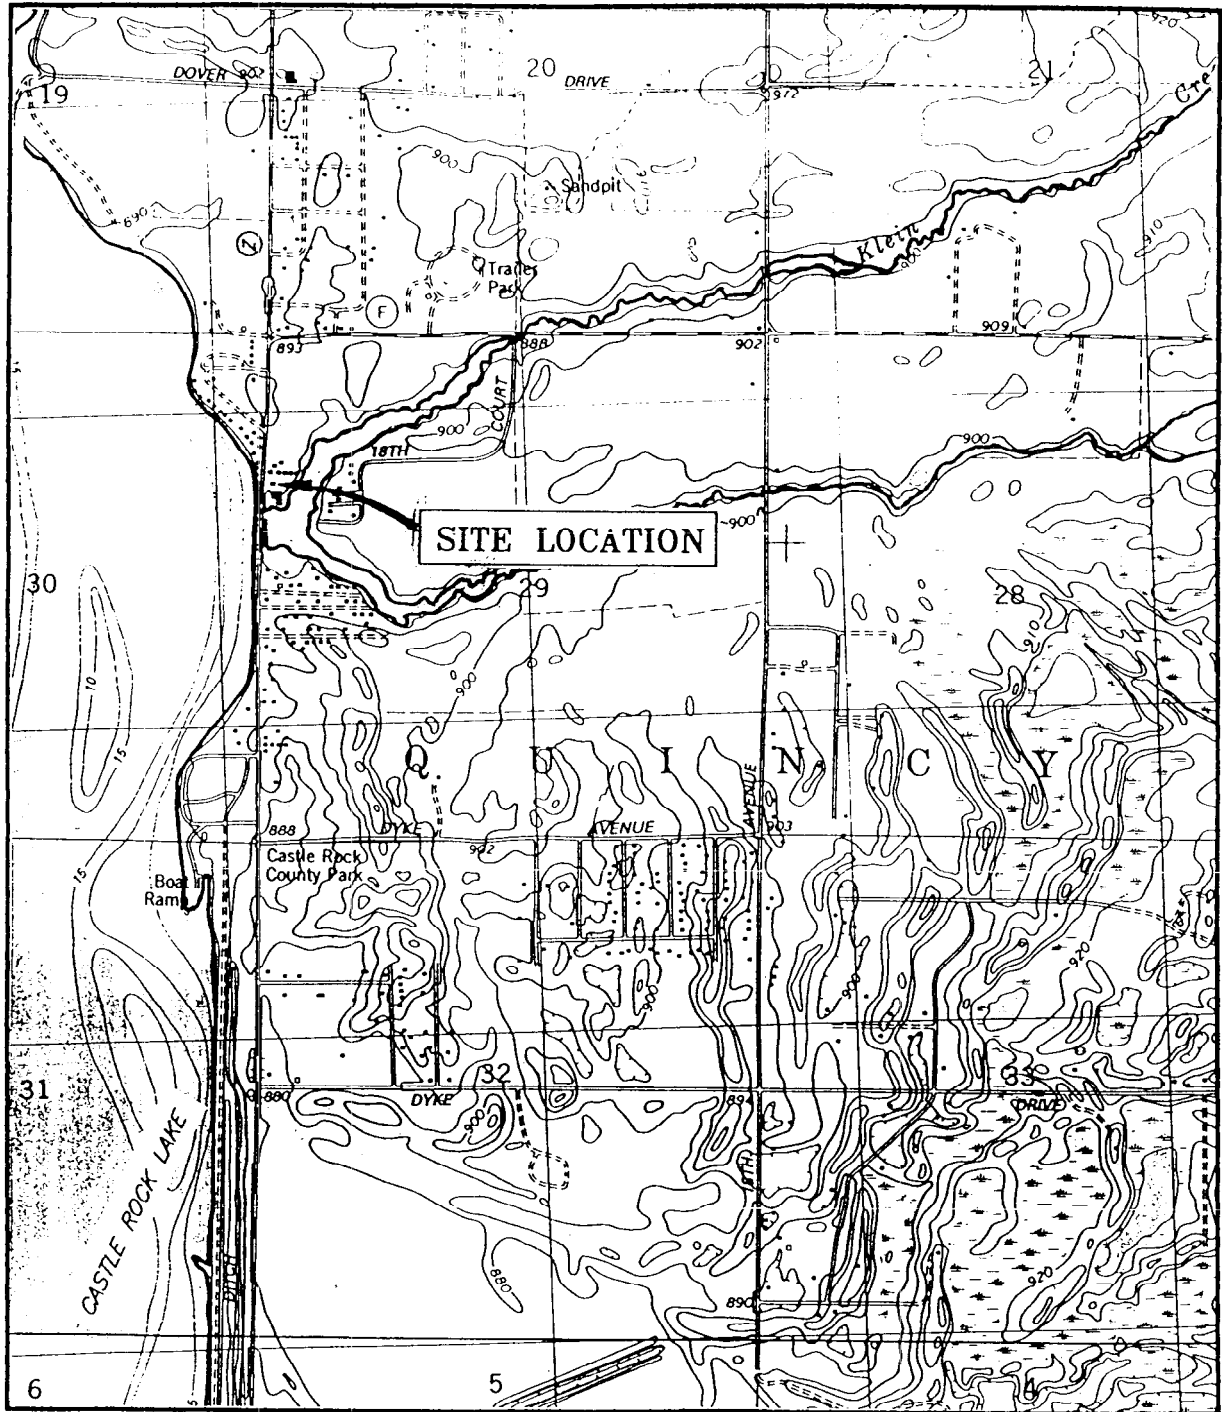

If you need more information, you may contact me at (608) 648-3431 or Mr. Tom Hvizdak with the WDNR at (715) 421- 7850.

Sincerely Yours,

Randy Kreisler

**RE: Submittal of Groundwater GIS Registry Package for Castle Rock Sport Shop,
2328 Highway Z, Friendship, Wisconsin (Adams County)
BRRS ID # 03-01-0001227
MES Project # 12-21039**

Dear Mr. Hvizdak:

Midwest Engineering Services, Inc., (MES) has prepared the following Groundwater GIS Registry information for the subject property, Castle Rock Sport Shop, CTH Z, Town of Quincy, Friendship, Wisconsin, as follows:

1. A copy of the most recent deed for the property, Document 373384, recorded in Volume 1630, Page 26, Adams County Register of Deeds, is included as Attachment A. The property is not part of a certified survey map or recorded plat.
2. The Parcel Identification Number is 26-751.
3. The WTM coordinates are 525076, 382757. See Attachment B for printout of map from WDNR GIS Registry.
4. A location map (Figure 1) is included in Attachment C.
5. A site map, Figure 3, is included as Attachment D.
6. The groundwater analytical results are included as Table 3 in Attachment E.
7. An isoconcentration map for naphthalene, lead, xylenes and trimethylbenzenes, with groundwater flow, is included as Attachment F.
8. A geologic cross section is enclosed as Attachment G.
9. A review fee check in the amount of \$250.00 is enclosed.

I certify that the legal description included as Attachment A is complete and accurate to the best of my knowledge and belief.

Please call Alan Drum at Midwest Engineering Services, Inc., at (920) 745-2200 if you have questions about this GIS Registry or you need more information.

Sincerely,

A handwritten signature in black ink, reading "Randall J. Kreisler". The signature is written in a cursive style with a large, sweeping initial "R" and a long, horizontal flourish extending to the right.

Randall Kreisler
